To People Who Are Under Normal Weight

Good Advice For Thin, Undeveloped Men and Women- Who Want to Put on Flesh

Thousands of people suffer from excessive thinness, weak nerves and feeble stomachs who, having tried advertised flesh-makers, food-fads, physical culture stunts and rub-on creams, resign themselves to life-long skinniness and think nothing will make them fat. Yet their case is not hopeless. A recently discovered combination of assimilative agents has made fat grow after years of thinness, and it is also unequalled, judging from reports, for repairing the waste of sickness or faulty digestion and for strengthening the nerves. This remarkable preparation is called Sargol. Six strength-giving, fat-producing assimilative elements of acknowledged merit have been combined in this preparation, which is endorsed and used by prominent people everywhere. It is absolutely harmless, inexpensive and efficient.

A few weeks' systematic use of Sargol should go far to produce flesh and strength by correcting faults of digestion and by supplying nourishing fats to the blood. If not, every drugglat who sells it is authorized to return the purchase price. Increased nourishment is obtained from the food eaten, and the additional fats that thin people need are thus provided. H. M. Lerou's Drug Store, Norwich; Chesber's Drug Store, Willimantic; and other leading druggists supply Sargol and say there is a large demand for it.

While this now preparation has from reports given splendid results as a serve tonic and vitalizer, its use is not recommended to nervous people unless they wish to gain at least ten pounds of flesh.
